## **Academic Projects**

# A mobile web application for Android using Adobe PhoneGap

- Created a web application using HTML, CSS, and JavaScript.
- · Converted the application to an APK for use on android operating systems.

# An interactive prototype of a mobile application

- Created a wireframe prototype for an application allowing users to find and review restaurants in their area.
- Used InVision online prototyping platform to allow navigation of the wireframe.
- Project involved conducting user tests with the prototype and iterating the design.

# **Professional Experience**

Event Administrator, Lifetouch Sports Photography, Farmingdale, NY August 2014 – September 2017

- Engaged with customers to provide them information on events, and the products and services available.
- Received and organized customer order forms and filed out and organizing event paper work.
- Kept events running in an ordered and organized fashion, promoting an efficient but enjoyable environment by balancing the needs of customers and staff.

### Junior Repair Technician, Espresso D'Milan, Coram, NY

September 2016 – January 2017

- Performed troubleshooting and basic repairs.
- Traveled to multiple locations.

### Office Clerk, NBTY, INC., Bohemia, NY, (Temp)

September 2015 – February 2016

- Maintained the label inspection database entering new inventory and inspection results. Communicated with manufacturing representatives to inquire about issues, and discharge release or quarantine orders.
- Greatly increased productivity by streamlining the procedure for the label review process and training other employees to perform the new streamlined process.
- Trained new employees entering the position on job duties and procedures.
